Subject Index of Volume 41

Activation
of dihydrogen by Ru(II)-chelating phosphine complexes and activation of dioxygen bu Ru(II) porphyrin complexes; update, 147
Alcohol(s)
allylic; Pa and As(III) oxide-catalyzed allylic alkylation by, under neutral conditions, 245
and CO; selective homogeneous production of alkyl formate from, using metal carbonyl/alkoxide catalyst systems, 329
mechanism of CO hydrogenation to, on potassium-promoted Mo–SiO_2, 385
methanol:
electrocatalytic reduction of CO_2 to, with quinone derivatives immobilized on Pt and stainless steel, 303
transition metal homogeneous catalysis for liquid-phase dehydrogenation of, 209
Aldehydes
bis(salicylaldehyde)ethylenediiminocobalt(II)-catalyzed C-10 oxygenation of estrogens, 349
formaldehyde and dimethoxymethane; lithium halide-assisted formation of polyoxymethylene dimethyl ethers from, 391
formaldehyde hydroformylation to glycol aldehyde via rhodium phosphine–amine and phosphine–amide catalysts, 163
mixed C_7; reaction kinetics of aldol condensation of, 313
Aldol condensation
reaction kinetics of, of mixed C_7 aldehydes, 313
Alkenes, Olefins
allylic C–P bond formation catalyzed by Ni complexes, 235
ethylene dimerization; new syntheses of solid catalysts for, 375
ethylene homo- and co-polymerization; Ni catalysis for, 123
Pa and As(III) oxide-catalyzed allylic alkylation by allylic alcohols under neutral conditions, 245
photochemically induced olefin oxidation by titanyl and vanadyl porphyrins, 361
Alkylation
Pa and As(III) oxide-catalyzed allylic, by allylic alcohols under neutral conditions, 245
Alkyl complexes
of permethylscandocene and permethyltantalocene; alpha- and beta-migratory insertion and elimination processes for, 21
Alkyl formate
selective homogeneous production of, from CO and alcohol using metal carbonyl/alkoxide catalyst systems, 329
Alkynes
1-alkynes and nitriles: Co-catalyzed synthesis of pyridines from; substrate structure and regioselectivity, 261
Amides
formaldehyde hydroformylation to glycol aldehyde via rhodium phosphine–amine and phosphine–amide catalysts, 163
Amines
formaldehyde hydroformylation to glycol aldehyde via rhodium phosphine–amine and phosphine–amide catalysts, 163
synthesis of *N*-acyl-α-amino esters via Co-catalyzed carbonylation of *N*-acyl-α-alkoxyamines, 135
Aromatic compounds
Co-catalyzed synthesis of pyridines from 1-alkynes and nitriles; substrate structure and regioselectivity, 261
direct synthesis of 1,3-benzodioxol-2-one from styrene, dioxygen and CO_2 promoted by Rh(I), 355
electrocatalytic reduction of CO_2 to methanol with quinone derivatives

© Elsevier Sequoia/Printed in The Netherlands

immobilized on Pt and stainless steel, 303
inorganic base-mediated double carbonylation of iodobenzene to give phenylglyoxylic acid catalyzed by Pa complexes, 379
preparation of 2-substituted benzoxazoles from phenolic Schiff bases by copper(I) chloride-catalyzed oxidation with dioxygen in pyridine, 253
Arsenic
Pa and As(III) oxide-catalyzed allylic alkylation by allylic alcohols under neutral conditions, 245

Carbon bonds
allylic C–P bond formation catalyzed by Ni complexes, 235
formation of C–C bonds using organotransition metal enolate complexes, 41
Carbon dioxide
direct synthesis of 1,3-benzodioxol-2-one from styrene, dioxygen and CO_2 promoted by Rh(I), 355
electrocatalytic reduction of, to methanol with quinone derivatives immobilized on Pt and stainless steel, 303
Carbon monoxide
and alcohol; selective homogeneous production of alkyl formate from, using metal carbonyl/alkoxide catalyst systems, 329
mechanism of, hydrogenation to alcohols on potassium-promoted Mo–SiO_2, 385
Carbonyl
metal carbonyl/alkoxide catalyst systems; selective homogeneous production of alkyl formate from CO and alcohol using, 329
silylcobalt, and new catalytic reactions, 197
Carbonylation
Co-catalyzed:
recent developments in, 89
synthesis of *N*-acyl-α-amino esters via, of *N*-acyl-α-alkoxyamines, 135
inorganic base-mediated double, of iodobenzene to give phenylglyoxylic acid catalyzed by Pa complexes, 379
Carboxylic acids
effect of, on metathesis of methyl 10-undecenoate, 367
metalla-; synthesis, structure, reactiviy and thermal decomposition, 1
CIR–FTIR study
mechanism of deactivation in phosphine-modified Rh-catalyzed hydroformylation, 293
mechanism of phosphine-modified Rh-catalyzed hydroformylation, 271
Clusters
and colloids and catalysis, 59
Cobalt
bis(salicylaldehyde)ethylenediiminocobalt(II)-catalyzed C-10 oxygenation of estrogens, 349
-catalyzed carbonylation:
of *N*-acyl-α-alkoxyamines; synthesis of *N*-acyl-α-amino esters via, 135
recent developments in, 89
-catalyzed synthesis of pyridines from 1-alkynes and nitriles; substrate structure and regioselectivity, 261
silylcobalt carbonyl and new catalytic reactions, 197
Colloids
and clusters and catalysis, 59
Condensation
aldol; reaction kinetics of, of mixed C_7 aldehydes, 313
Copper
preparation of 2-substituted benzoxazoles from phenolic Schiff bases by Cu(I) chloride-catalyzed oxidation with dioxygen in pyridine, 253

Deactivation
mechanism of, in phosphine-modified Rh-catalyzed hydroformylation; CIR–FTIR study, 293
Dehydrogenation
liquid-phase, of methanol; transition metal homogeneous catalysis for, 209
Dimerization
ethylene; new syntheses of solid catalysts for, 375
Dimethoxymethane
and formaldehyde; lithium halide-assisted formation of polyoxymethylene dimethyl ethers from, 391

Enolate complexes
organotransition metal; formation of C–C bonds using, 41

Esters
N-acyl-α-amino; synthesis of, via Co-catalyzed carbonylation of *N*-acyl-α-alkoxyamines, 135
Estrogens
bis(salicylaldehyde)ethylenediiminocobalt(II)-catalyzed C-10 oxygenation of, 349
Ethers
polyoxymethylene dimethyl; lithium halide-assisted formation of, from dimethoxymethane and formaldehyde, 391

FTIR–CIR study
mechanism of deactivation in phosphine-modified Rh-catalyzed hydroformylation, 293
mechanism of phosphine-modified Rh-catalyzed hydroformylation, 271

Group VIII metal
-catalyzed organic syntheses via metallacyclic intermediates, 75

Hydroformylation
formaldehyde, to glycol aldehyde via rhodium phosphine–amine and phosphine–amide catalysts, 163
mechanism of phosphine-modified Rh-catalyzed, studied by CIR–FTIR, 271
phosphine-modified Rh-catalyzed; CIR–FTIR study of mechanism of deactivation in, 293
Hydrogen
activation of dihydrogen by Ru(II)-chelating phosphine complexes and activation of dioxygen by Ru(II) porphyrin complexes; update, 147
Hydrogenation
CO; mechanism of, to alcohols on potassium-promoted Mo–SiO_2, 385

Immobilization
electrocatalytic reduction of CO_2 to methanol with quinone derivatives immobilized on Pt and stainless steel, 303
Insertion
alpha- and beta-migratory, and elimination processes for alkyl complexes of permethylscandocene and permethyltantalocene, 21

Iodobenzene
inorganic base-mediated double carbonylation of, to give phenylglyoxylic acid catalyzed by Pa complexes, 379

Lithium halide
-assisted formation of polyoxymethylene dimethyl ethers from dimethoxymethane and formaldehyde, 391

Metallacarboxylic acids
synthesis, structure, reactivity and thermal decomposition, 1
Metallacyclic intermediates
Group VIII metal-catalyzed organic syntheses via, 75
Metathesis
effect of carboxylic acids on, of methyl 10-undecenoate, 367
Molybdenum
mechanism of CO hydrogenation to alcohols on potassium-promoted Mo–SiO_2, 385

Nickel
allylic C–P bond formation catalyzed by Ni complexes, 235
catalysis for ethylene homo- and copolymerization, 123
Nitriles
and 1-alkynes: Co-catalyzed synthesis of pyridines from; substrate structure and regioselectivity, 261
Nitrogen
catalytic reduction in dinitrogen in protic media; chemical models of nitrogenase, 221
Nitrogenase
catalytic reduction in dinitrogen in protic media; chemical models of, 221

Olefins: see Alkenes
Organothenium complexes
high oxidation state; synthesis, structure and reactivity, 109
Oxidation
Cu(I) chloride-catalyzed, with dioxygen in pyridine; preparation of 2-substituted benzoxazoles from phenolic Schiff bases by, 253
photochemically induced olefin, by titanyl and vanadyl porphyrins, 361
state, high, organothenium complexes;

synthesis, structure and reactivity, 109
Oxygen
activation of dihydrogen by Ru(II)-chelating phosphine complexes and activation of dioxygen by Ru(II) porphyrin complexes; update, 147
aspects of metalloporphyrin-catalyzed oxygenation of hydrocarbons with anionic single oxygen donors, NaOCl and $KHSO_5$, 185
direct synthesis of 1,3-benzodioxol-2-one from styrene, dioxygen and CO_2 promoted by Rh(I), 355
preparation of 2-substituted benzoxazoles from phenolic Schiff bases by copper(I) chloride-catalyzed oxidation with dioxygen in pyridine, 253
Oxygenation
aspects of metalloporphyrin-catalyzed, of hydrocarbons with anionic single oxygen donors, NaOCl and $KHSO_5$, 185
bis(salicylaldehyde)ethylenediiminocobalt(II)-catalyzed C-10, of estrogens, 349

Palladium
and As(III) oxide-catalyzed allylic alkylation by allylic alcohols under neutral conditions, 245
inorganic base-mediated double carbonylation of iodobenzene to give phenylglyoxylic acid catalyzed by Pa complexes, 379
Phosphorus
activation of dihydrogen bu Ru(II)-chelating phosphine complexes and activation of dioxygen by Ru(II) porphyrin complexes; update, 147
allylic C–P bond formation catalyzed by Ni complexes, 235
formaldehyde hydroformylation to glycol aldehyde via rhodium phosphine–amine and phosphine–amide catalysts, 163
mechanism of deactivation in phosphine-modified Rh-catalyzed hydroformylation; CIR–FTIR study, 293
mechanism of phosphine-modified Rh-catalyzed hydroformylation studied by CIR–FTIR, 271
Photochemistry
photochemically induced olefin oxidation by titanyl and vanadyl porphyrins, 361
Platinum
and stainless steel; electrocatalytic reduction of CO_2 to methanol with quinone derivatives immobilized on, 303
Polymerization
ethylene homo- and co-; Ni catalysis for, 123
Porphyrins
activation of dihydrogen by Ru(II)-chelating phosphine complexes and activation of dioxygen by Ru(II) porphyrin complexes; update, 147
aspects of metalloporphyrin-catalyzed oxygenation of hydrocarbons with anionic single oxygen donors, NaOCl and $KHSO_5$, 185
titanyl and vanadyl; photochemically induced olefin oxidation by, 361
Potassium
aspects of metalloporphyrin-catalyzed oxygenation of hydrocarbons with anionic single oxygen donors, NaOCl and $KHSO_5$, 185
mechanism of CO hydrogenation to alcohols on potassium-promoted Mo–SiO_2, 385
Protic media
catalytic reduction in dinitrogen in; chemical models of nitrogenase, 221

Reduction
catalytic, in dinitrogen in protic media; chemical models of nitrogenase, 221
electrocatalytic, of CO_2 to methanol with quinone derivatives immobilized on Pt and stainless steel, 303
Rhodium
direct synthesis of 1,3-benzodioxol-2-one from styrene, dioxygen and CO_2 promoted by Rh(I), 355
formaldehyde hydroformylation to glycol aldehyde via rhodium phosphine–amine and phosphine–amide catalysts, 163
mechanism of deactivation in phosphine-modified Rh-catalyzed hydroformylation; CIR–FTIR study, 293
mechanism of phosphine-modified Rh-catalyzed hydroformylation studied by CIR–FTIR, 271

Ruthenium
activation of dihydrogen by Ru(II)-chelating phosphine complexes and activation of dioxygen by Ru(II) porphyrin complexes; update, 147

Scandium
alpha- and beta-migratory insertion and elimination processes for alkyl complexes of permethylscandocene and permethyltantalocene, 21
Schiff bases
phenolic; preparation of 2-substituted benzoxazoles from, by Cu(I) chloride-catalyzed oxidation with dioxygen in pyridine, 253
Silicon
mechanism of CO hydrogenation to alcohols on potassium-promoted Mo–SiO_2, 385
silylcobalt carbonyl and new catalytic reactions, 197
Sodium
aspects of metalloporphyrin-catalyzed oxygenation of hydrocarbons with anionic single oxygen donors, NaOCl and $KHSO_5$, 185
Spectroscopy
CIR–FTIR study:
mechanism of deactivation in phosphine-modified Rh-catalyzed hydroformylation, 293
mechanism of phosphine-modified Rh-catalyzed hydroformylation, 271
Stainless steel
and Pt; electrocatalytic reduction of CO_2 to methanol with quinone derivatives immobilized on, 303
Syntheses
Group VIII metal-catalyzed organic, via metallacyclic intermediates, 75
new, of solid catalysts for ethylene dimerization, 375
Synthesis
Co-catalyzed, of pyridines from 1-alkynes and nitriles; substrate structure and regioselectivity, 261
direct, of 1,3-benzodioxol-2-one from styrene, dioxygen and CO_2 promoted by Rh(I), 355
of *N*-acyl-α-amino esters via Co-catalyzed carbonylation of *N*-acyl-α-alkoxyamines, 135
and structure and reactivity; high oxidation state organothenium complexes, 109
and structure, reactivity, thermal decomposition; metallacarboxylic acids, 1

Tantalum
alpha- and beta-migratory insertion and elimination processes for alkyl complexes of permethylscandocene and permethyltantalocene, 21
Thermal decomposition
and synthesis, structure, reactivity; metallacarboxylic acids, 1
Transition metal
homogeneous catalysis for liquid-phase dehydrogenation of methanol, 209
organotransition metal enolate complexes; formation of C–C bonds using, 41

Undecenoate
methyl 10-; effect of carboxylic acids on metathesis of, 367
